Minimum Safety Requirements

Access to the Site	Please note that only one person per truck is allowed to enter the Sibelco site and to get off the cab of the vehicle staying in the working area within the minimum amount of time needed to perform the loading / unloading operations. A second driver could attend the operation for training purposes, only if approved by the Sibelco site management.	
Recording	Recording and photography are strictly prohibited.	
Sheeting	All sheeting must be done either from ground level, or using sheeting platforms where provided. All loads must be sheeted before leaving site.	
Access to Top of Tankers	This is acceptable providing all safety procedures are adhered to i.e. three points of contact whilst climbing access ladders, a suitable and sufficient safety rail erected on top of the tanker along the walkway, and an Harness if required by Local Legislation or Local Site Rules.	
Access inside vehicle bodies	Entry into tanker bodies is strictly prohibited.	
Vehicle cleanliness	All vehicles must arrive on site clean and ready to load.	
Reporting policy	At Sibelco we have policies in place for everyone to speak up and report any near misses or hazards that they identify and we promote a no blame culture, your support will allow us to ensure a proactive approach to all hazards and your support on this is highly appreciated. All Breakdowns must be reported to the site manager. No breakdown / Recovery Companies will be allowed on site without prior management consent and a safe working procedure being in place.	
Speed limits	Site speed limits must be followed.	
Site traffic rules	Site traffic rules must be followed at all times.	
Reversing	Reversing must be kept to a minimum and a banksman requested if necessary.	
Mobile Phones	Use of mobile phones whilst driving around site is strictly prohibited.	
Rings	Wearing rings not covered by protective gloves is not permitted.	
Drugs and Alcohol	Sibelco has a with cause and a random drug and alcohol testing policy in place, this applies to hauliers on site according to the national legislations.	

NOTE: this is a common non-exhaustive list, further specific PPE / requirements could be requested in agreement with the local legislation and local site rules
